E. Catarsi *Peer education e formazione dei tutor: un progetto contro il disagio scolastico nell'Empolese Valdelsa*, Edizioni del Cerro, Tirrenia, 2002

The publication introduces peer education methods starting from an integrated project carried out by a network of Institutes of Upper Education and the Study Centre "Bruno Ciari" in the province of Florence in the school year 2000-2001. It is a very detailed publication, with graphs and statistics. It shows good practices related both to the training of students' mentors and to the assessment criteria and methods used in the project. The mentors' interviews at the conclusion of the project are particularly interesting.
